Frontend Developer — Vue.js & TypeScript

Europe-based · CET/CEST · Open to remote opportunities worldwide · Employment, B2B, or freelance

PROFILE

I build dependable business applications with Vue.js and TypeScript — from data-heavy dashboards and reusable component systems to cross-platform products.

10+ years in commercial web development, including 4+ years focused on Vue.js applications.

EXPERIENCE

Independent Frontend Developer

Apr 2023 — Present

Independent

Deliver contract, freelance, and personal Vue.js products from requirements through deployment. Recent and current work includes an end-to-end client website, My Shift, PolandShopPrice, Mentor AI, and NDA business platforms with role-based workflows and reporting.

Frontend Developer

Jan 2022 — Mar 2023

Organic Code

Independently designed, developed, and delivered an MVP of personal accounts for assessment participants and specialists working with school students. Built participant management, test assignments, result dashboards, charts, and detailed interpretations while collaborating with backend and testing-frontend developers.

Frontend Developer

Jan 2021 — Dec 2021

PandaTeam

Maintained and extended a legacy Vue 2 application as part of a two-person frontend team. Implemented clearly scoped features and adapted solutions to an existing codebase.

Freelance Consultant

Mar 2013 — Jan 2021

Independent

Delivered websites and business applications from requirements through deployment. Coordinated designers and backend developers, translated business needs into implementation tasks, and built WordPress, Joomla, JavaScript, and Vue.js solutions, including a live e-commerce platform with custom administration and delivery logic.

SELECTED PROJECTS

Advertising Operations Platform

Generalized project name; client details are confidential under NDA.

Sole frontend developer for a large role-based administration platform. Recommended Quasar for rapid delivery and built the frontend for an MVP that the team launched in six months.

Vue 3 · TypeScript · Quasar · Pinia · RBAC · REST API

Poland Group Website & Shop

Delivered a public WordPress website and a live Vue.js store. Coordinated a designer and backend developer, built the storefront and administration interface, and defined packing logic that selects box sizes, prevents incompatible product combinations, and includes packaging costs in order totals.

WordPress · Vue.js · JavaScript · E-commerce · Custom admin

Financial Operations Platform

Generalized project name; client details are confidential under NDA.

Owned the complete frontend delivery in collaboration with a backend developer. Turned an Excel-based process with extensive manual work into a role-based platform for transactions, expenses, reporting, filtering, and data exports.

Vue 3 · TypeScript · Vuetify · RBAC · Reporting · REST API

My Shift

A multilingual shift-planning application with reminders, countdowns, and practical productivity features.

Vue 3 · TypeScript · Quasar · Capacitor · PWA

Educational Assessment Platform

Generalized project name; client details are confidential under NDA.

Independently delivered an MVP of participant and assessment-specialist portals. Integrated with a separate testing application and visualized assessment results through dashboards, charts, and detailed interpretations.

Vue 3 · Quasar · Pinia · GraphQL · Apollo · ApexCharts

SKILLS

Core frontend

Vue 2/3 · Composition API · TypeScript · JavaScript · HTML5 · CSS3

Delivery & platforms

Vite · Git · GitHub · GitLab · Capacitor · Cordova · Figma

Application architecture

Quasar · Vuetify · Pinia · Vuex · RBAC · REST API · Axios

Additional experience

Tailwind CSS · Laravel · PostgreSQL · MySQL · Agile

TEACHING

IT2.0 School

Conducted HTML and CSS workshops and mentored beginner frontend developers.
